

## Price List – 1st June 2023

### NHS

Patients aged under 18 (when referral received) who qualify are eligible for treatment free of charge. The exception to this is for patients in treatment who lose or break their orthodontic appliances beyond repair and the appliance needs to be replaced (NHS Regulation 11). There is then an NHS charge of £92.00 (April 2023) per arch (subject to change).

### PRIVATE

After an initial deposit we offer a 11 month interest free payment option. At Ipswich Orthodontics we aim to offer a variety of finance options to suit your budget, therefore if you would like to spread the cost of treatment further, we also offer credit options through Tabeo Ltd. Please ask us for further details. *Note: Credit decisions will be subject to individual circumstances. You must be over 18 and earn an income to apply.*

The price of your treatment includes your active orthodontic treatment and one year's post-treatment follow-up. The cost will vary according to the complexity of your case and the fees listed below provide a guide to the initial fee and options available to you. (Replacement appliances/retainers if lost or broken are an additional charge).

- |   |                           |
